Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make

their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

Meet Noah Tass. Follow him as he tries to escape his hayseed hometown in Missouri. This is not a movie. This is someone's life. Noah was turning 23 and desperate leave. Pulnick had forever been a blemish on the anemic face of rural Bible-belt America. Always bland and soporific, it was now being invaded by white supremacist meth heads, visited by an unprecedented crime wave, exploited by spiritualists and local politicians, and driven to hysteria by paranoid rumors that the world would end on November 11th. Moreover, Noah's personal life was becoming more convoluted by the day. Everything seemed to conspire against his singular need to get out of this dreary, dead-end, death-wish armpit of a town. "11-11-11" is what you call a feel good novel. You'll feel good about your own life when you get a load of the losers who populate this living graveyard!

Few paint a more vivid or varied picture of the joys of riding than this collection of stories from a motorcycling life by Lance Oliver, who has spent more time than most of us thinking about and writing about the art and practicalities of motorcycling.

An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experi-

ments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Written as a stand-alone or follow-up to David L. Hough's wildly successful duo, "Proficient Motorcycling" and "Street Strategies," this book contains invaluable lessons for avoiding nasty accidents. Presenting new tips and topics geared toward protecting riders from road dangers with a special focus on mental and physical preparedness. Diagrams, examples, plain talk, and Hough's practical attitude make this one of the most accessible guides available.

"The Perfect Motorcycle" provides the definitive, step-by-step process any motorcyclist can use to identify, find, and purchase the right bike. The book's practical advice and proven techniques are accompanied by invaluable worksheets that save time and money.

Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. *Riding in the Zone* helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. *Riding in the Zone* takes riders to the next level in their skill set.
