~~Radio Controlled Clock Behaving Oddly—Page 1—Computers ...~~

Radio controlled watches and clocks receive a time signal from a radio transmitter tuned to a caesium or 'Atomic Clock'. The atomic clock is the standard measure of time: the electron resonance frequency of the Caesium 133 atom is 9,192,631,770 cycles per second which is measured to give a time accurate to greater than +/- 1 second per million years.

When the battery is inserted the hands will travel to either 12, 4 or 8 o'clock and stop while it searches for the time signal. Depending on the strength of the signal, this can take a couple of minutes or a couple of hours. Once found the hands will travel to the correct time and depending on which model of clock, it will check the signal several times a day to ensure correct timekeeping.

radio-controlled clock Instruction Manuals for Precision ... Our Radio Controlled clocks can be manually set and used anywhere. If your clock did not set the first time or after daylight savings time change, try the following instructions: 1) Take out the battery and place the battery in backwards for about 10 seconds, then replace it again in the correct position.

Staiger Radio Controlled Clock Instructions - lonelyguides Try rotating the clock. Most radio-controlled clocks have an internal antenna that picks up the signal most effectively when it is facing directly towards or away from Anthorn. Some clocks have a signal strength indication that helps in finding the best reception. Try moving your clock to a different location.

Radio-controlled clock showing incorrect time - NPL Instructions for setting a radio controlled wall clock. A radio controlled wall clock or "atomic clock" contains an atomic oscillator, a radio, and an antenna that enable the clock to be regularly synchronised with a true atomic clock. In North America, your clock is synchronised with the atomic clock at the National Institute of Standards and Technology in Boulder, Colorado.

Instructions for setting a radio-controlled wall clock Our Radio Controlled clocks can be manually set and used anywhere. If your clock did not set the first time or after daylight savings time change, try the following instructions: 1) Take out the battery and place the battery in backward for about 10 seconds, then replace it again in the correct position.
