There is no clear answer to this question. Formally speaking a vector is simply an element of the set  $V$  where  $V$  is the underlying set for some vector space. You could try to say that  $V$  is an ordered pair of  $n$  real numbers, which is true up to isomorphism for finite dimensional vector spaces over the real numbers.

The department also offers courses in Mathematics for Economists, Econometrics, Financial Mathematics, Mathematical Economics, Mathematical Programming, Operational Research, and in cooperation with the Department of Statistics we offer a course in Quantitative Methods for Business Administration.
