Information Technology for Management: Improving Strategic ...

GAO-04-394G Information Technology Investment Management ...

IT management is the discipline whereby all of the information technology resources of a firm are managed in accordance with its needs and priorities. These resources

may include tangible investments like computer hardware, software, data, networks and data centre facilities, as well as the staff who are hired to maintain them.

A typical information technology (IT) department is composed of several common sub-functions, or teams, that work together to define and support a company's technology-related needs. IT departments identify system requirements, develop and manage business applications, manage technology infrastructure and provide employees with desktop support, among other things.
