IS10CV - MICHAEL GABRIELLE

A system audit is a review of the quality system used by a company. It is a review of how quality standards are measured and met by the company. It verifies the procedures used to measure the quality of the product, how defects are recorded, and how the company ensures that failed product is not passed.

Quality audit is the process of systematic examination of a quality system carried out by an internal or external quality auditor or an audit team. It is an important part of an organization's quality management system and is a key element in the ISO quality system standard, ISO 9001 .

Typically, management system auditors will prepare custom checklists that reflect the specific scope, scale, and objectives of the quality management system being audited. Enter basic details Before beginning preparations for the audit, enter some basic details using the form fields below .

Internal Audits need to be scheduled at planned intervals to check that the quality system conforms to requirements and that the system is effective. 'Requirements' include the standard itself, as well as the company's own requirements (i.e., it's own procedures and policies).
