"Tells a story that could inspire everyday behavior change for all of us. Small steps, leading to one big milestone: a planet free of plastic pollution." —Daniella Dimitrova Russo, CEO and founder of Think Beyond Plastic™ Like many people, Beth Terry didn't think an individual could have much impact on the environment. But while laid up after surgery, she read an article about the staggering amount of plastic polluting the oceans, and decided then and there to kick her plastic habit. In Plastic-Free, she shows you how you can too, providing personal anecdotes, stats about the environmental and health problems related to plastic, and individual solutions and tips on how to limit your plastic footprint. Presenting both beginner and advanced steps, Terry includes handy checklists and tables for easy reference, ways to get involved in larger community actions, and profiles of individuals—Plastic-Free Heroes—who have gone beyond personal solutions to create change on a larger scale. Fully updated, Plastic-Free also includes sections on letting go of eco-guilt, strategies for coping with overwhelming problems, and ways to relate to other people who aren't as far along on the plastic-free path. Both a practical guide and the story of a personal journey from helplessness to empowerment, Plastic-Free is a must-read for those concerned about the ongoing health and happiness of themselves, their children, and the planet. "This is the tool that we've all been waiting for to ease the transition to going plastic-free. Time to wake up. Peace." —Rosanna Arquette, actor, Plastic Pollution Coalition member "Practical and hopeful, with a kind of cheerleading charm." —The Washington Post

The Italian scientist Guglielmo Marconi was the real inventor of wireless communication, which includes, for example, radio, cell-

phones and even the new self-driving cars. The main characters of Maurizio Agostini's books are two 'accidental detectives': Marcello, an accountant without any notable qualities, and Francesca, a very feminine transgender person. They meet Eleonora, a distant descendant of the great Guglielmo, while she is investigating the last invention of Marconi: the Death Ray, a secret weapon that destroys weapons. Mussolini was convinced till his end that, if Marconi hadn't died, the war would have ended very differently. During their investigations, our protagonists encounter international intrigues, scientific mysteries, unbelievable accidents with 'zero probability' and discover the true Marconi, who was very different from his official image. And... they also remain involved in an intriguing 'menage a trois'. In the end, they succeed in discovering the 'musical secret' of the Death Ray, at present hidden in the most impenetrable archive in the world.

The Third Edition of ANSI/ACCA Manual D is the Air Conditioning Contractors of America procedure for sizing residential duct systems. This procedure uses Manual J (ANSI/ACCA, Eighth Edition) heating and cooling loads to determine space air delivery requirements. This procedure matches duct system resistance (pressure drop) to blower performance (as defined by manufacturer's blower performance tables). This assures that appropriate airflow is delivered to all rooms and spaces; and that system airflow is compatible with the operating range of primary equipment. The capabilities and sensitivities of this procedure are compatible with single-zone systems, and multi-zone (air zoned) systems. The primary equipment can have a multi-speed blower (PSC motor), or a variable-speed blower (ECM or constant torque motor, or a true variable speed motor). Edition Three, Version 2.50 of Manual D (D3) specifically identifies normative requirements, and specifically

identifies related informative material.
