No Crank, No Start Diagnosis - EricTheCarGuy

There are two basic types of no-start conditions: crank/no start and no crank/ no start. When an engine cranks, you can hear it spin, but the engine doesn't catch and run on its own. So with a no crank/no start, you don't hear the engine moving at all. You might hear a click or buzz but other than that, nothing.

Solving Automotive No-Start Problems | EricTheCarGuy

With a no crank/no start condition, the first thing to check is the battery. The battery or battery problems are the number-one cause of this type of no-start condition. A quick way to check your battery is to turn your headlights on.

No Crank/No Start | EricTheCarGuy

First Confirm Your Engine Has No Spark. Disable the fuel system by removing the fuel pump fuse or relay. Insert a spark plug tester into the plug boot and ground it on a piece of metal on the engine. Finally, Have someone crank the engine and watch for spark. If the engine has a coil-on-plug ignition system with no plug wires:

No Spark - When Your Engine Cranks But Has No Spark

What should you do when your engine cranks, but just does not want to start. If your engine cranks normally, but fails to start, at least you know your battery is good and the starter motor works. Check, spark, fuel and compression.

Engine Cranks - But Fails To Start - What Should You Do

no start no crank no click - GM How to diagnose a no start no click on GM vehicle. If you have a late model GM vehicle and turn the

key only to hear nothing, you'll most likely think you have a dead battery—and you may. But a no start, no crank, no click condition can be far more involved than that.

no start no crank no click - GM — Ricks Free Auto Repair ...
 When your engine won't crank, most of the time a quick diagnosis is possible. The procedure outlined here walks you through the most common causes for a no-crank condition and will save you time in getting to the source of the problem, even if you don't have much mechanical experience.

Engine Won't Crank Over | AxleAddict

I did find a bad splice under the outside relay box on the left hand side of the truck. I repaired the bad splice but still no spark. I have tried finding a schematic online to see if I was getting power to my PCM but I couldn't find anything. I have no check engine light coming on on the dashboard.

Engine Cranks but No Spark or Fuel - 2CarPros

NOTE: This bulletin applies to vehicles built on or before May 05, 2008 (MDH 0505XX). SYMPTOM/CONDITION: The customer will experience a no engine crank AND a no engine start condition. Also, the remote keyless entry system will not operate. This condition may be due to an electrostatic discharge (ESD) from the ignition key into the Wireless Control Module (WCM), causing the WCM to ...

No Engine Crank Or No Engine Start Due To Electronic ...

It started as a no crank/ no start(no click,dash lights came on and didn't dim, only sound was fuel pump) about a month ago. Initially(when I hadn't replaced anything yet) out of about 100 crank attempts, around the 80th attempt it randomly started up then died after a few seconds and wouldn't crank or start again.

No crank/no start. New battery, alternator, starter, igni...

To restate what a crank/no start is, it's when you turn the key and you can hear the engine moving but it's just not catching and running. You can first eliminate all the above causes in this article because you have confirmed that your starter, cables, and battery connections are likely good.

Crank/No Start | EricTheCarGuy

Without oil, an engine can destroy itself in a matter of seconds. When no oil shows on the dipstick but the oil light in the car did not come on, there is probably about at least two quarts left. If the light comes on, it means that the oil pump is not picking any oil up from the pan so there is no oil circulating, and therefore no oil pressure.
