The 4 Best PC Sound Cards of 2020 – Lifewire

Giving your computer system a sound output supporting a wide range of configurations. These include 2.0, 2.1, 5.1 & 7.1. Essential for the music lovers, gamers and movie enthusiasts. The interface of these sound cards are either PCI or PCIe, check specifications of the individual product to confirm.

In the world of “aftermarket components for PCs” Asus is king, and their old-school Xonar SE makes for an affordable and well-designed high resolution 5.1 PCIe gaming sound card with 192kHz/24-bit audio and 116dB SNR, which is not bad considering the price tag of well under \$50.

Click the Arrow next to Sound, video and game controllers. Your sound card is in the list that appears. Through the search box. Microsoft Windows users can determine their sound card by following the steps below. Click Start in the lower-left corner of your screen, or navigate to the Start Screen in Windows 8. Windows 10 users can skip to step 2.

The sound card requires additional power apart from PCIe power, which it receives through the 6-pin power connector. The sound card features ESS

Sabre9006A DAC, which supports up to 24bit 192-kHz playback with an SNR of 116 dB, which could have been a bit higher like the similarly priced BlasterX AE-5.
