A little more than seventy-five years ago,

Kate L. Turabian drafted a set of guidelines to help students understand how to write, cite, and formally submit research writing. Seven editions and more than nine million copies later, the name Turabian has become synonymous with best practices in research writing and style. Her *Manual for Writers* continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines. Now in its eighth edition, *A Manual for Writers of Research Papers, Theses, and Dissertations* has been fully revised to meet the needs of today's writers and researchers. The Manual retains its familiar three-part structure, beginning with an overview of the steps in the research and writing process, including formulating questions, reading critically, building arguments, and revising drafts. Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles (notes-bibliography and author-date), an array of source types with contemporary examples, and detailed guidance on citing online resources. The final section treats all matters of editorial style, with advice on punctuation, capitalization, spelling, abbreviations, table formatting, and the use of quotations. Style and citation recommendations have been revised throughout to reflect the sixteenth edition of *The Chicago Manual of Style*. With an appendix on paper format and submission that has been vetted by dissertation officials from across the country and a bibliography with the most up-to-date listing of critical resources available, *A Manual for Writers* remains the essential resource for students and their teachers.

National Bestseller Winner of the Whitbread Book of the Year Ruby Lennox begins narrating her life at the moment of conception, and from there takes us on a whirlwind tour of the twentieth century as seen through the eyes of an English girl determined to learn about her family and its secrets. Kate Atkinson's first novel is "a multigenerational tale of a spectacularly dysfunctional Yorkshire family and one of the funniest works of fiction to come out of Britain in years" (*The New York Times Book Review*). The visionary author's masterpiece pulls us—along with her Black female hero—through time to face the horrors of slavery and explore the impacts of racism, sexism, and white supremacy then and now. Dana, a modern black woman, is celebrating her twenty-sixth birthday with her new husband when she is snatched abruptly from her home in California and transported to the antebellum South. Rufus, the white son of a plantation owner, is drowning, and Dana has been summoned to

save him. Dana is drawn back repeatedly through time to the slave quarters, and each time the stay grows longer, more arduous, and more dangerous until it is uncertain whether or not Dana's life will end, long before it has a chance to begin.

George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature - his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While *1984* and *Animal Farm* are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In *Politics and the English Language*, the second in the *Orwell's Essays* series, Orwell takes aim at the language used in politics, which, he says, 'is designed to make lies sound truthful and murder respectable, and to give an appearance of solidity to pure wind'. In an age where the language used in politics is constantly under the microscope, Orwell's *Politics and the English Language* is just as

relevant today, and gives the reader a vital understanding of the tactics at play. 'A writer who can - and must - be rediscovered with every age.' — *Irish Times*

course: Seminar Academic Discourse, language: English, abstract: Academic writing is a task that students, especially in the social sciences, engage in very frequently during the course of their studies. They have to compose essays, research reports, term papers etc., which, besides being the basis for students' evaluation, are to prepare them for their professional careers later in life. For those who will stay in the field, writing is going to be a major activity. At university a student's writing skills set him or her apart from other students in the eyes of the professor, but there is no real competition; all papers will be read by the instructors. In the professional world, however, with an abundance of academic texts and with limited time, only those articles will get attention that, besides containing profound reasoning, are at the same time well written, i.e. conveniently structured, precise, short, well formulated etc. This paper is part of a study on academic writing conducted within the seminar "Academic Discourse." The study examines students' works with regard to the authors' writing skills. It looks at the various components of a student term paper (linguistic features and structural elements) to de-

tect the problems German students of English have. The objective is to create a guide for current and future students in this department experiencing difficulties in this area. It combines advice from published writing guides and professors, linguistic theory and personal experience, and is to be an introduction to academic writing for beginners and a reference booklet for the more experienced. We did not attempt to produce a "How-to" manual but rather tried to name the problem areas and to offer help on those with advice and examples. It cannot take the responsibility off the students for the further refinement of their skills by othe
