How to Use Interface--Documentation on SAP Solution Manager

The BAPI interfaces WebSphere Adapter for SAP

Software supports outbound processing and inbound processing for simple BAPIs. In outbound processing, the client applications call BAPIs and other RFC-enabled functions on the SAP server. In inbound processing, the SAP server sends an RFC-enabled function (such as a BAPI function) through the adapter to an endpoint. If the application (and thus the SAP MaxDB interface) is on a different computer than the database, the database system also needs the SAP MaxDB X Server (communication server) for communication. Note that the JDBC interface needs the X Server even if it is installed on the same computer as the database. More information: X Server documentation

Today I want to present the possibility to get the interface and the documentation of a function module (FM). My example uses CCo, the COM Connector for the RFC library, but you can use also other ways to call a RFC function module (FM). I use the RFC FMs RFC_GET_FUNCTION_INTERFACE and RFC_FUNCTION_-

DOCU_GET. The first example in Visual Basic Script uses only RFC_GET_FUNCTION_INTERFACE.
