The new controller generation SIMATIC S7-1200 and S7-1500 has an up-to-date system architecture, and together with the TIA Portal offers new and efficient options of programming and configuration. It is no longer the resources of the controller (e.g. data storage in the memory) that are paramount but the actual automation solution itself.

This course is advanced version for Learn Siemens S7-1200 from scratch. In this course you will primarily learn: How to structure the PLC program using Struct and UDT How to interface RFID via IO-Link master in Siemens S7-1200

SIMATIC S7-1200 controllers are the intelligent choice for compact automation solutions with extended communication options and integrated technology functions. They are available in standard and failsafe versions.
