00YNX8 - LAUREL ESTRELLA

Georgie Codd is scared of fish. Really, really scared. Loving the sea and resenting her phobia, she plots to cross continents, learn to dive and swim with the world's biggest fish: the mighty whale shark. Georgie soon plunges into a realm of strange creatures and intrepid diving adventurers. But as her quest to fight fear expands over oceans, the shark remains elusive, and everything else starts to fall apart around her.

Individuals are not racist by intent; they are racist by culture, heritage, and education. If I were to ask anyone if they were a racist, they would immediately deny it as a possibility. They would espouse their wonderful humanitarian acts, or friends of color that would support an embracement of diversity that would make us all proud. The truth, I have never met a racist that knew they were racist. Even when educated as to what they have done, they would go to their grave stating that under no circumstances should I ever consider them a racist. This book is designed to tell you that it does not matter how many racists you meet in the office, you can still be successful. This book is designed to help you identify, and cope, and achieve success in those corporate environments that are not well. It provides you with advice on how to "swim with sharks in dark water." This book will help you to use your "Spidey senses," to trust your gut, to identify when you are working on a plantation, how to cope until you can leave. Oh, by the way, I need to tell you that you do not have the power at any time on any day to fix the plantation, without permanently damaging your career. The people who have fixed these issues have sacrificed their career, possibly their livelihood to ensure that we do not experience what they did. They shall always be the nameless heroes of our generation. We will always be indebted to those individuals who spoke up and lost their livelihood as a result. You need to understand that making a difference has a cost, and those that have done this have paid dearly.

In this remarkable groundbreaking book, a documentarian and conservationist, determined to dispel misplaced fear and correct common misconceptions, explores in-depth the secret lives of sharks—magnificent creatures who play an integral part in maintaining the health of the world's oceans and ultimately the planet. From the Jaws blockbusters to Shark Week, we are conditioned to see sharks as terrifying cold-blooded underwater predators. But as Ocean Guardian founder William McKeever reveals, sharks are evolutionary marvels essential to maintaining a balanced ecosystem. We can learn much from sharks, he argues, and our knowledge about them continues to grow. The first book to reveal in full the hidden lives of sharks, Emperors of the Deep examines four species—Mako, Tiger, Hammerhead, and Great White—as never before, and includes fascinating details such as: Sharks are 50-million years older than trees; Sharks have survived five extinction level events, including the one that killed off the dinosaurs; Sharks have electroreception, a sixth-sense that lets them pick up on electric fields generated by living things; Sharks can dive 4,000 feet below the surface; Sharks account for only 6 human fatalities per year, while humans kill 100 million sharks per year. McKeever goes back through time to probe the shark's pre-historic secrets and how it has become the world's most feared and most misunderstood predator, and takes us on a pulse-pounding tour around the world and deep under the water's surface, from the frigid waters of the Arctic Circle to the coral reefs of the tropical Central Pacific, to see sharks up close in their natural habitat. He also interviews ecologists, conservationists, and world-renowned shark experts, including the founders of Greenpeace's Rainbow Warrior, the head of the Massachusetts Shark Research Program, and the self-professed "last great shark hunter." At once a deep-dive into the misunderstood world of sharks and an urgent call to protect them, Emperors of the Deep celebrates this wild species that hold the key to unlocking the mysteries of the ocean—if we can prevent their extinction from climate change and human hunters.

Diving with Sharks is a complete guide for divers seeking sharks or anyone interested in these incredible creatures. The book takes a detailed look at shark biology and behaviour, and features all the popular, and many lesser known, shark species that divers can encounter. A thrilling survival story from Michael Northrop, the acclaimed author of TRAPPED. He couldn't sleep. That's how it all started. When Davey wakes, just as the sun is rising, he can't wait to slip out of the crammed hotel room he's sharing with his family. Leave it to his parents and kid brother to waste an entire day of vacation sleeping in! Davey heads straight for the beach, book and glasses in hand, not bothering to leave a note. As the sparkling ocean entices him, he decides to test the water, never mind that "No Swimming" sign. But as the waves pull him farther from shore, Davey finds himself surrounded by water -- and something else, too. Something circling below the surface, watching, waiting. It's just a matter of time. Michael Northrop is the New York Times bestselling author of TombQuest, an epic book and game adventure series featuring the magic of ancient Egypt. He is also the author of Trapped, an Indie Next List Selection, and Plunked, a New York Public Library best book of the year and an NPR Backseat Book Club selection. 2017 Amelia Bloomer List, Early Readers Nonfiction Before Eugenie Clark's groundbreaking research, most people thought sharks were vicious, blood-thirsty killers. From the first time she saw a shark in an aquarium, Japanese-American Eugenie was enthralled. Instead of frightening and ferocious eating machines, she saw sleek, graceful fish gliding through the water. After she became a scientist—an unexpected career path for a woman in the 1940s—she began taking research dives and training sharks, earning her the nickname "The Shark Lady."

As a lifelong student of the sales game, Mackay has spent decades collecting secrets, wisdom, and anecdotes. He features his Mackay Morals-life lessons such as: • Big shots are just little shots who kept shooting. • Helping someone up won't pull you down-and could very easily pull them to your side. • Be like the turtle: If he didn't stick his neck out, he wouldn't get anywhere at all. There is no one better to show you how to be a high-energy, determined, creative sales dynamo than Harvey Mackay.

At once feared and revered, sharks have captivated people since our earliest human encounters. Children and adults alike stand awed before aquarium shark tanks, fascinated by the giant teeth and unnerving eyes. And no swim in the ocean is undertaken without a slight shiver of anxiety about the very real—and very cinematic—dangers of shark bites. But our interactions with sharks are not entirely one-sided: the threats we pose to sharks through fisheries, organized hunts, and gill nets on coastlines are more deadly and far-reaching than any bite. In Sharks and People acclaimed wildlife photographer Thomas Peschak presents stunning photographs that capture the relationship between people and sharks around the globe. A contributing photographer to National Geographic, Peschak is best known for his unusual photographs of sharks—his iconic image of a great white shark following a researcher in a small yellow kayak is one of the most recognizable shark photographs in the world. The other images gathered here are no less riveting, bringing us as close as possible to sharks in the wild. Alongside the photographs, Sharks and People tells the compelling story of the natural history of sharks. Sharks have roamed the oceans for more than four hundred million years, and in this time they have never stopped adapting to the ever-changing world—their unique cartilage skeletons and array of super-senses mark them as one of the most evolved groups of animals. Scientists have recently discovered that sharks play an important role in balancing the ocean, including maintaining the health of coral reefs. Yet, tens of millions of sharks are killed every year just to fill the demand for shark fin soup alone. Today more than sixty species of sharks, including hammerhead, mako, and oceanic white-tip sharks, are listed as vulnerable or in danger of extinction. The need to understand the significant part sharks play in the oceanic ecosystem has never been so urgent, and Peschak's photographs bear witness to the thrilling strength and unique attraction of sharks. They are certain to enthrall and inspire.
