The Business of Shipbuilding : George Bruce : 9781859788516

Shipbuilding is the construction of ships and other floating vessels. It normally takes place in a specialized facility known as a shipyard. Shipbuilders, also called shipwrights, follow a specialized occupation that traces its roots to before recorded history. Shipbuilding and ship repairs, both commercial and military, are referred to as "naval engineering". The construction of boats is a similar activity called boat building. The dismantling of ships is called ship breaking.

Colombo Dockyard in Colombo, Sri Lanka, is the largest engineering facility in the business of ship repair, shipbuilding, heavy engineering and offshore engineering in Sri Lanka. NorthStar Shipbuilding Pvt Limited in New Mumbai, India, is one of the leading shipyard in India for small and mid-size ships.

All these changes coupled with the amount of innovation in material, manufacturing automation, IoT, 3D printing, laser scanning, etc. is (or should be) changing the business of shipbuilding. In my previous post Business of Shipbuilding I talked about the business of shipbuilding and the many factors which are considered for any shipbuilder. With all the new technology innovations becoming more mature we will need to consider how these new technologies will change the way we do business.

The business of shipbuilding as mentioned is one of the most complex “businesses” in manufacturing today. Some of the reasons are because every ship is unique (bespoke), the number of parts exceeds 5x-10x that of aerospace, combined with the fact that we are procuring material, engineering the ship and constructing the ship at the exact same time .
