A powerful epic of interstellar travel, alternate sexuality, and overpowering obsession, "The Dark Beyond the Stars" is currently in development by Francis Ford Coppola for a major motion picture project.

WINNER OF THE ARTHUR C. CLARKE AWARD • "A stunning novel and a beautiful evocation of a truly alien world."—Sunday Times (UK) "Beckett renders the terror of the darkness beyond the forests with a riveting deftness that evokes all primordial fears of the unknown."—N. K. Jemisin, The New York Times Book Review On the alien, sunless planet they call Eden, the 532 members of the Family take shelter beneath the light and warmth of the Forest's lantern trees. Beyond the Forest lie the mountains of the Snowy Dark and a cold so bitter and a night so profound that no man has ever crossed it. The Oldest among the Family recount legends of a world where light came from the sky, where men and women made boats that could cross the stars. These ships brought us here, the Oldest say—and the Family must only wait for the travelers to return. But young John Redlantern will break the laws of Eden, shatter the Family and change history. He will abandon the old ways, venture into the Dark . . . and discover the truth about their world. Already remarkably acclaimed in the United Kingdom, Dark Eden is science fiction as literature: part parable, part powerful coming-of-age story, set in a truly original alien world of dark, sinister beauty and rendered in prose that is at once strikingly simple and stunningly inventive. Praise for Dark Eden "A linguistic and imaginative tour de force."—The Guardian (UK) "Captivating and haunting . . . human plight and alien planet are both superbly evoked."—Daily Mail (UK) "Pure astonishment and pleasure, a storytelling ride full of brio and wonder."—Locus

Delancey Sullivan knows for sure that there is more than one universe. Many more. Because every time someone makes a choice, a new, parallel world spins off the existing one. Eating breakfast or skipping it, turning left instead of right, sneaking out instead of staying in bed - all of these choices create an alternate universe in which an echo self takes the road not travelled. Del knows all of this because she's a Walker, someone who can navigate between the worlds, and whose job is to keep the dimensions in harmony. But Del's decisions have consequences too. And when she secretly starts to investigate other dissonant worlds she's intrigued by the echo versions of Simon Lane, a guy who won't give her the time of day in the main world, but whose alternate selves are uniquely interested. But falling for Simon draws Del closer to a truth that the Council of Walkers is trying to hide - a secret that threatens the fate of the entire multiverse.

ORIGINAL TRADE PAPERBACK THE WAYPOINT TO ULTIMATE POWER! Over a millennium in the past, humans fleeing Earth in slower-than-light vessels discovered the Waywork, an abandoned alien superhighway system that allows instantaneous travel from star to star. The problem: there are a finite number of Waypoint nodes—and the burgeoning population of humans is hemmed in as a result. Furthermore, humanity is divided into contending Starstates. One of the strongest is based on an oligarchy ruling families, but still mostly democratic. The other is a totalitarian nightmare. War seems

inevitable. Now a new Waypoint appears. Might it lead to the long-lost creators of the Waywork? If so, there may be knowledge and technology that will tip the balance in the coming war. Three people race to make it to the new Waypoint—and beyond. These include Wyodreth Antagean, the reluctant son of an interstellar shipping magnate, Lady Garsina Oswight, the daring daughter of a royal family, and Zuri Mikton, a disgraced flag officer seeking redemption. They are facing an implacable foe in Golsbril Vex, a merciless, but highly effective, autocrat from the Waywork's most brutal regime. Vex is determined to control the new Waypoint and whatever revelation or power lies on the other side. Now humanity's fate—to live in freedom or endless dictatorship—depends on just what that revelation might be. And who gets there first. TWO NOVELS OF TIME-TRAVELING ADVENTURE. Includes *Time Scout* and *Wagers of Sin*. When an experiment on an orbiting space station went wrong, ripples in time washed over the Earth bringing global disaster. The survivors, beginning to rebuild, learned that they were now able to travel into the past, utilizing the remnant time strings. But first, the time strings had to be mapped. That was the job of the brave pioneers known as time scouts. Their occupation was only slightly less dangerous than front line combat, and when it was discovered that a time traveler who wasn't extremely careful could zap himself out of existence, elaborate rules to prevent that evolved, and it was the job of the time scouts to enforce them. *Time Scout*: Kenneth Kitó Carson was one of the best, if not the best, time scouts in the business. But he has collected more than a few scars, both physical and mental, while poking around back in time, and trying not to draw the dangerous attention of the natives, not always successfully. Nowadays, he runs a small hotel at Time Terminal 86, and just wants to be a hotelier renting rooms to tourists on their way to see the Roman Circus Maximus or Victorian London firsthand . . . until a certain red-headed girl flounces out of his life through an illicit gate that may collapse and leave her lost eternally in the corridors of time . . . *Wagers of Sin*: Time Travel stations have become big business, with wealthy tourists taking vacations back in time. For Skeeter Jackson, one of Time Terminal 86's least honest residents, scamming those tourists is a way of life. A man's got to follow his calling, even a con man, and Skeeter might be a dyed-in-the-wool thieving scoundrel, but he freely admits it and relishes the crisp, cool feel of cash in hand until one of his scams went terribly wrong, and he was in more trouble than even his quick wits and crooked tricks could get him out of again. At the publisher's request, this title is sold without DRM (Digital Rights Management).

"Part murder mystery and part mind-bending time-travel story. . . Full of imagination" (Booklist). Say you're a time traveler and you've already toured the entirety of human history. After a while, the world might lose a little of its luster. That's why this time traveler celebrates his birthday partying with himself. Every year, he travels to an abandoned hotel in New York City in 2071, the hundredth anniversary of his birth, and drinks twelve-year-old Scotch (lots of it) with all the other versions of who he has been and who he will be. Sure, the party is the same year after year, but at least it's one party where he can really, well, be himself. The year he turns thirty-nine, though, the party takes a stressful turn. Before he even makes it into the grand ballroom for a drink he encounters the body of his forty-year-old self, dead of a gunshot wound to the head. As the older versions of himself at the party point out, the onus is on him to figure out what went wrong—he has one year to stop himself from being murdered, or they're all goners. As he follows clues that he may or may not have willingly left for himself, he discovers rampant paranoia and suspicion among his younger selves, and a frightening conspiracy among the Elders. Most complicated of all is a haunting woman, possibly named Lily, who turns up at the party this year—the first person he's ever seen there besides himself. For the first time, he has something to lose. Here's hoping he can save some version of his own life. "A clever enough premise that it could be straight out of a Philip K. Dick or Kurt Vonnegut novel." —Pittsburgh Post-Gazette "A dark hybrid of Paul Auster and the film *Memento*, complete with a mysterious love interest . . . Best of all, however, is the evocation of mid-21st century New York as a

melancholy, dilapidated place high in entropy, cluttered with ruined buildings, and weirdly infested with parrots." —Toronto Star

Volume 58 of *Reviews in Mineralogy and Geochemistry* presents 22 chapters covering many of the important modern aspects of thermochronology. The coverage of the chapters ranges widely, including historical perspective, analytical techniques, kinetics and calibrations, modeling approaches, and interpretational methods. In general, the chapters focus on intermediate- to low-temperature thermochronometry, though some chapters cover higher temperature methods such as monazite U/Pb closure profiles, and the same theory and approaches used in low-temperature thermochronometry are generally applicable to higher temperature systems. The widely used low- to medium-temperature thermochronometric systems are reviewed in detail in these chapters, but while there are numerous chapters reviewing various aspects of the apatite (U-Th)/He system, there is no chapter singularly devoted to it, partly because of several previous reviews recently published on this topic.
