— Erik Brynjolfsson, *The Second Machine Age: Work, Progress, and Prosperity in a Time of Brilliant Technologies* “Technology is a gift of God. After the gift of life it is perhaps the greatest of God’s gifts. It is the mother of civilizations, of arts and of sciences.” —Freeman Dyson”

A New York Times Bestseller. A “fascinating” (Thomas L. Friedman, *New York Times*) look at how digital technology is transforming our work and our lives. *The Second Machine Age* | W. W. Norton & Company

The Second Machine Age is a celebration of the “bounty” that the exponential digitization capacity offers. However, Brynjolfsson and McAfee are also not afraid to point out the potential downsides to digitization, notably what the authors term “spread,” which is the “ever-bigger differences among people in economic success — in wealth, income, mobility

and other important measures.”

“The Second Machine Age helps us all better understand the new age we are entering, an age in which by working with the machine we can unleash the full power of human ingenuity. This provocative book is both grounded and visionary, with highly approachable economic analyses that add depth to their vision. A must read.”

*The Second Machine Age*. In *The Second Machine Age* MIT’s Erik Brynjolfsson and Andrew McAfee—two thinkers at the forefront of their field— make the case that we should be optimistic about the future because technological progress, ‘the only free lunch that economists believe in,’ is accelerating quickly past our intuitions and expectations.

A fundamentally optimistic book, *The Second Machine Age* alters how we think about issues of technological, societal, and economic progress.

1. The big stories. Now comes the second machine age, where we use computers for doing mental work. Currently we live in a world, where we experience tremendous progress in digital technologies, the changes will be very beneficial for humans but there will arise new threats as well.

The second machine age is presented as a fait accompli; the march of artificial intelligence will only speed up. This rhetorical form does not invite workers, scholars, citizens, refugees, or others anywhere near the debate.

The Second Machine Age: Work, Progress, and Prosperity in a Time of Brilliant Technologies is a 2014 book by Erik Brynjolfsson and Andrew McAfee which is a continuation of their book Race Against the Machine. They argue that the Second Machine Age involves the automation of a lot of cognitive tasks that make humans and software-driven machines substitutes, rather than complements.

### **The Second Machine Age Work**

The second machine age is affecting change and the book presents many good examples. They take their premise to the point where the machines (androids) will start to replace most of what we do now. The authors delve into the economics and what the ramifications will be.
